 (1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

McKinley New Mexico
 (Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Cable tools used all the way. 694 feet of 10" casing was set by under reaming being used as a conductor pipe for protection. This pipe was not cemented when set. From this point 8" casing was used and by under reaming this pipe the hole was carried to a total depth of 1310 feet. The 8" casing was used for a mud seal off of water at 1103'. This casing was not cemented. No oil or gas of commercial value was encountered.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
