15 December, 1962

Well No. 24-2X is located 515' ft. from S line and 100' ft. from W line of sec. 24

SW 1/4 Sec. 24
(Sec. and Sec. No.)

17 N, 11 W
(Twp.) (Range)

N.M.P.M.
(Meridian)

Wildcat
(Field)

McKinley
(County or Subdivision)

New Mexico
(State or Territory)

The elevation of the derrick floor above sea level is 6775' ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

350' Section - Meramec Test

We plan to drill a $4\frac{3}{4}$ " hole to test the Meramec formation only by rotary. Should we hit oil, we plan to set $2\frac{7}{8}$ " tubing, 15' from our production zone and cement. After taking an electric log, we plan to shoot 12' bullets (per foot) and then back at bottom of hole; wash and drill stem test. Then cap, and await your instructions.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced:

Company Genie Seamount
