DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Although it showed in and hits (see log sheet), none showed up in log analysis (taken at 195' and 200' respectively). We will try to complete log by 100' before there is a thin...

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
