The well was cleaned out, by using a cable tool rig. Proved to be dry and subsequently plugged ( March 24, 1983 ). The hole was completely filled with cement from top to bottom. A 4' stand pipe and sign was left above ground. All pits were disposed of and covered.

This work was done by L. C. Jones Drilling Co., for S & J Oil Co. Farris Mines had granted them a working interest in their Lease, under certain conditions, which were not met, subsequently this agreement was terminated.
