**DETAILS OF WORK**

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Due to production decreasing to a point where it is uneconomical to produce the well, we intend to abandon as follows:

Place 25 sx cement over perforations 1885-1900, attempt to recover casing. Will spot 10 sx on casing stub if any is recovered. Place mud between plugs. Spot 10 sx in top of surface pipe with 4" marker.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
