NW 28-20N-9W*

Attn: Mr. Dick Scanlon

Dear Sir:

Our records indicate that the above well was completed in 1959 at a total depth of 542 feet and an initial potential of 3 barrels of oil per day. However production records do not indicate that the well has produced in the last several years. You have informed me by telephone this morning that it is possible that this well will be used as an injection well by Osborn and Weir who are now operating the property and are instituting a water flood project.

Will you please write us a letter verifying this fact. Also please file Well Record, Form G-105.

Yours very truly

*Emery C. Arnold
