Mr. A. B. Hughes
Sedan, New Mexico

Dear Mr. Hughes:

We will not be able to approve the Notice of Intention to Drill on your #1 Seward well in Section 19-20N-9W until we have received a surveyor's plat locating the well. We also note that you have not indicated that you intend to run surface casing. As this is a requirement under our Rules and Regulations I would suggest that you re-submit Notice of Intention to Drill indicating size of pipe you intend to use and the approximate depth of both the surface pipe and the production string.

Yours very truly

Emery C. Arnold
Supervisor, District #3
