17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This well is currently in long term shut-in status. Request that this status be continued for additional one year period. Well produces approximately 1-1/2 bbls of oil per day. Substantial gas reserves behind pipe 2236'-2250', but cannot afford to construct gas pipeline to Gas Co. of New Mexico, Star Lake compressor station (nearest market) approximately 4-1/2 miles.

Bond log shows good bonding to 490' from the surface. Casing in well is sound and no contamination of other formations is contemplated.
