Dear Sir:

I am sorry we haven't completed the casing of C.T.U. Wolfenden #1 well but due to rainy conditions we haven't been able to complete it, however we have all materials and will get on it right away now when it dries up.

I appreciate your patience with us and we will complete it in the near future.

Thank you.

Sincerely,  
B.B. & S. Properties  
Orville Moore mgr.

Re: Proper Abandonment  
CTV Oil & Gas Co., #1 Wolfenden  
1980/N; 990/E, 28-17N-7W

Dear Mr. Hatch:

The above well was spudded March 23, 1966 and completed March 30, 1966. Reports filed indicate that the well was drilled to a total depth of 1945 feet in the Massive Gallup Sandstone. Seven inch casing was cemented at thirty feet with ten sacks of cement.

Upon completion, B B & S Properties, Box 666, Grants, New Mexico who is the landowner, indicated that they desired to convert the well to a water well. On May 13, 1966 we informed B B & S Properties of Commission requirements for the proper conversion of the well. These requirements were acknowledged by B B & S Properties and on June 28, 1966 Form C-103 was filed stating their intention to cement casing in the well. On September 8, 1966 an inquiry was made as to what progress had been made on the work. On September 11, 1966 we received a letter from Mr. Orville Moore, Manager for B B & S Properties, informing us that the work would be done in the near future.

To my knowledge the well has still not been cased. I therefore recommend that a case be set for hearing to allow the operator, CTV Oil & Gas Company, and the landowner, B B & S Properties, to show cause why the well should not be properly cased and converted to a water well or, in the alternative, be plugged and abandoned in compliance with Conservation Commission rules.

I am enclosing the correspondence file on this well. I am also sending copies of this letter to CTV Oil & Gas Company and to B B & S Properties so that they will be advised of this action.

Yours very truly,

Emery C. Arnold  
Supervisor, District #3
