(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

17 September, 1965

Well No. Navajo #1 is located 350' ft. from [N] line and 570' ft. from [E] line of sec. 2

NE 1/4 NE 1/4 NE 1/4 sec 2 (1/4 Sec. and Sec. No.) 17N (Twp.) 11W (Range) NMPM. (Meridian)

Wildcat (Field) McKinley (County or Subdivision) New Mexico (State or Territory)

The elevation of the derrick floor above sea level is 6705' ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Up to 350' Mesquite Test, to be rotary drilled & 4 3/4" hole. Casing when ever necessary, & electrical log if needed + cuttings. Should we find oil commercially, we plan to set up to 350' of 2 7/8" tubing 15' from production sand & cement with approx. 5 bags of cement. After electrical log, we would plan to shoot our production zone (2 bullets per foot) & set up pump, tank etc... should the test fail, we plan to cement hole from top to bottom, fill up sand pits & clean up site.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
