Mr. J. Ewing Walker
2203 E. Wilshire Blvd.
Oklahoma City, Oklahoma

Dear Ewing:

As you know, we have successfully completed our Santa Fe No. 72 Well in the Lower Hospah Sand. This well is located in the southeast of the southeast of Section 1, T-17N, R-9W, McKinley County, New Mexico on a 52-acre lot. We are requesting approval from the New Mexico Conservation Commission to allocate the entire acreage of this lot to the well for allowable purposes which would result in a legal allowable of 91 barrels of oil per day.

We have been advised that before approval can be granted by the Commission, you, as an offset operator, must be advised of this application since this is a non-standard unit.

If you have no objection to this application, you need do nothing. However, if for some reason you have a valid reason why this should not be approved, you are to so advise the Commission within 20 days after receipt of this letter.

I recently spent some time in Hospah and found out that our LACT meter was loaned to Tenneco rather than to Walker Bros. I had a moment or two to spend with Lonnie and he seemed very happy about the way operations were going.

I want to thank you again for your hospitality on my recent visit to Oklahoma City. If you ever visit San Antonio, I would like to reciprocate.

Best personal regards.

Yours very truly,

A handwritten signature in cursive script that reads "Harold".

Harold Vagtborg, Jr.
