Dear Mr. Kendrick:

The reference well is a water injection well in the Gallup Zone and Dakota gas well. We are submitting the following packer leakage data from a test taken October 26, 1976.

UPPER GALLUP ZONE: 737 bbls. water injected
880# pressure

DAKOTA GAS ZONE: Casing pressure: 320#
Static: 9.2
Differential: 4.4
Orifice: .875
Spring: 100#
MCF: 183

In our opinion, this information indicates there is no communication between zones.

Yours very truly,

J. D. Hicks
