Mr. Butler:

Mr. Slaughter called from Cuba, N. M. on July 19th to advise us that he was ready to plug the well. When he and our representative were on location, he had decided to drill deeper. He drilled to 600 feet.

July 20th Mr. Slaughter called that he was ready to plug. He did place the down-hole plugs on July 20th, but the dry hole marker has not been erected to my knowledge. He has been advised to notify this office when the marker is in place so that we can release the bond.

Yours very truly,
