OIL CON. DIV.
DIST. 3

Dear Mr. Chavez:

We are submitting the following packer leakage test data for the above referenced well. The data is the result of a 24-hour test taken on March 2, 1983 for the Upper Zone and March 5, 1983 for the Lower Zone.

Upper Zone:	Oil:	4 bbls
	Water:	59 bbls
	Gravity:	34.2° @ 70° F.
	Gas Vol:	TSTM

Lower Zone:	Oil:	5 bbls
	Water:	224 bbls
	Gravity:	25.3° @ 70° F
	Gas Vol:	TSTM

In our opinion, these tests indicate that there is no communication between zones.

Sincerely,

TENNECO OIL COMPANY

Alexander M. McLean
Production Engineer
Western Rocky Mountain Division
