Hospah Lower Sand
South Pool

Dear Mr. Arnold:

We are submitting the following packer leakage data on the reference well. It is a 24 hour test taken 8-22-72 on upper zone and 8-17-72 on lower zone.

UPPER ZONE:	Oil:	6
	Water:	7
	Gravity:	32.2 @ 60 degrees
	Gas Vol:	TSTM
LOWER ZONE:	Oil:	67
	Water:	452
	Gravity:	23.7 @ 60 degrees
	Gas Vol:	TSTM

In our opinion, this information indicates that there is no communication between the zones.

Yours very truly,

OK for packer test -
EL
