Hospah Lower Sand
South Pool

Dear Mr. Kendrick:

We are submitting the following packer leakage data on the reference well. It is a 24 hour test taken 10-21-76 on the upper zone and 10-21-76 on the lower zone.

UPPER ZONE: Oil 19
 Water: 56
 Gravity: 32 @ 60 degrees
 Gas Vol: TSTM

LOWER ZONE: Oil 43
 Water: 529
 Gravity: 23 @ 60 degrees
 Gas Vol: TSTM

In our opinion, this information indicates there is no communication between the zones.

Yours very truly,

J. D. Hicks
