South Pool

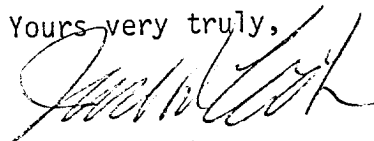

Dear Mr. Kendrick:

We are submitting the following packer leakage data on the referenced well. It is a 24 hour test taken on November 15, 1978 on the lower zone.

UPPER ZONE:	Static level full of fluid
	0# pressure
	No production
LOWER ZONE:	Oil 118
	Water 3819
	Gravity 23 @ 60 degrees
	Gas Vol TSTM

In our opinion, this information indicates there is no communication between the zones.

Yours very truly,

Jack D. Cook
