Re: Reports--Sand Springs #1,
A-10-17N-8W

Gentlemen:

We have received electric logs for the above well which indicate it was logged on 12-30-71. No sundry notices were received covering drilling operations or plugging operations. We also have nothing in our file to indicate a plugging procedure was approved nor do we have Form C-105, Well Record form.

I have discussed the matter with Mr. Herman Walters of Young Drilling Company and he informs me that verbal approval of a plugging program was made by this office prior to plugging.

Will you please submit the above requested information immediately so that we may relieve you of responsibility under your bond and close our files on this well.

Thank you.

Yours very truly,

Emery C. Arnold
