We spotted three cement plugs on this well on October 4, 1971, one from a depth of 1012' to 1212', the second from a depth of 110' to 160' and the third plug in the surface pipe, and erected a dry hole marker. A 31' joint of 7" surface pipe was left in this hole. The above plugs were spotted by Stewart Bros. Drilling Company through open ended drill pipe using their mud pump and steel tank for mixing. This location is ready for your inspection.
