17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

Upon temporary authorization granted by letter from the District Office of the New Mexico Oil Conservation Commission dated September 28, 1973, Northern Minerals, Inc. began injecting water through casing into the Hospah sand, 734' to 744'. Water was taken from a water well completed in the Massive Gallup and located 40' northwest of the 6-Y well. Under order No. R-4649 of the Commission, dated November 6, 1973, this injection procedure was continued. Order No. R-4875 in case No. 5321, dated October 22, 1974, made permanent, subject to limitations, the terms of order No. R-4649.

To October 1, 1974, there had been injected into the 6-Y well, 60,066 barrels water at pressures never exceeding 700 PSI. There has been no failure of the casing or leakage of water or oil.

12. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
