Re: Gas/Water Injection Wells  
South Hospah Lower Sand Pool

Gentlemen:

Order R-4383 (2) requires each well to be tubed to a packer within 100 feet of the casing shoe. Further, that the casing tubing annulus be filled with an inert fluid and the annulus equipped with a pressure gauge to facilitate detection of leakage in the tubing or packer.

This rule will also apply to the proposed new injection wells #54, #57, #58, #59 and #60.

If there are questions please contact us.

Yours very truly,

*A. R. Kendrick*  
A. R. Kendrick  
Engineer, District #3
