Re: Gas/Water Injection Wells
South Hospah Lower Sand Pool

Gentlemen:

Order R-4383 (2) requires each well to be tubed to a packer within 100 feet of the casing shoe. Further, that the casing tubing annulus be filled with an inert fluid and the annulus equipped with a pressure guage to facilitate detection of leakage in the tubing or packer.

This rule will also apply to the proposed new injection wells #54, #57, #58, #59 and #60.

If there are questions please contact us.

Yours very truly,

A. R. Kendrick
A. R. Kendrick
