17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any
proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones perti-
nent to this work.)

THIS SUNDRAY NOTICE AMENDS OUR PREVIOUS SUNDRY DATED NOVEMBER 28, 1990.

This well is currently in long term shut-in status. Request that this
status be continued for additional nine (9) month period.

We are currently making application to the Environmental Protection
Agency, Region 9, San Francisco, California for permission to inject
water into the Point Lookout Interval (approximately 2825-50' sub-surface)
of the Mesa Verde Formation in the subject area utilizing our Noo Navajo
#2 Well (NW/4NE/4, Sec. 13, T20N, R6W, NMMPM) as a water injection well.

The subject well is a direct offset to the area to be flooded and the
same interval hopefully will benefit from this secondary recovery project.
Additionally, it might also be used for a second water injection well.

The Scooter Well was making approximately 1-2 barrels of oil per day
when it went down with a defective pump. The cost of working-over this
well for 1 - 2 BOPD is, in our opinion, prohibitive, but with increased
production from the water flood, would be justified.

THIS APPROVAL EXPIRES SEP 01 1991
This well was drilled in 1976. Cement was circulated to surface and no
continuation of other formations is expected.

18. I hereby certify that the foregoing is true and correct
