

MINERALS MANAGEMENT INCORPORATED
A Division of SCIENTIFIC SOFTWARE CORPORATION

June 18, 1976

Mr. Jerry Long
U.S. Geological Survey
P.O. Box 1809
Durango, Colorado 81301

Dear Jerry:

On March 1, 1976, an Application to Drill was submitted on Filon Federal 21, Well No. 1 located 850' FSL and 2250' FWL, Section 21, T20N, R5W. You may recall that I verbally requested you hold up on approval since an alternate location was being considered. An alternate was chosen and an environmental inspection was done by Mr. John Keller of your office in late March. We are now ready to proceed with this location and have attached a new Application to Drill.

We appreciate your patience and co-operation in this matter.

Yours very truly,

J. Arnold Snell
Area Manager
