(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

THIS SUNDRY NOTICE AMENDS OUR PREVIOUS SUNDRY DATED NOVEMBER 28, 1990.

This well is currently in long term shut-in status. Request that this status be continued for additional nine (9) month period.

We are currently making application to the Environmental Protection Agency, Region 9, San Francisco, California for permission to inject water into the Point Lookout Interval (approximately 2825-50' sub-surface) of the Mesa Verde Formation in the subject area utilizing our Noo Navajo #2 Well (NW/4NE/4, Sec. 13, T20N, R6W, NMPM) as a water injection well.

The subject well is completed in this interval and hopefully will benefit from this secondary recovery project.

This well was making approximately 1 - 2 barrels of oil per day when it went down with parted rods. The cost of working over this well for 1 - 2 BOPD is, in our opinion, prohibitive, but with increased production from the water flood, would be justified.

This well was drilled in 1976. Cement was circulated to surface and no contamination of other formations is expected.

18. I hereby certify that the foregoing is true and correct		APPROVED
