

7. Method of Handling Waste Disposal

Waste will be buried in the reserve pit on completion of the well. The reserve pit will be backfilled. Toilet facilities will be provided.

8. Ancillary Facilities

No camps or airstrips will be used.

9. Diagram of Well Location

See attachment.

10. Plans for Restoration to Surface

The surface will be restored and reseeded as directed by the Bureau of Land Management.

11. Other Information

Impact on the environment will be minimal. The access road and well location is sparsely vegetated and minimal disturbance will be required. The wellsite has been moved to 960' FSL to stay 660' away from stone building.

12. Operator's Representative

Minerals Management, Inc., 501 Airport Dr., Suite 105, Farmington, New Mexico 87401.

13. Certification

I hereby certify that I have inspected the proposed drill-site and access route; that I am familiar with the conditions which presently exist; that the statements made in this plan are, to the best of my knowledge, true and correct; and, that the work associated with the operations proposed herein will be performed by Dome Petroleum Corporation and its contractors and subcontractors in conformity with this plan and the terms and conditions under which it is approved.
