17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Basin Fuels tested the Menfee perforations 2210 to 2042 and swabbed 1 barrel of water per hour. At the present time Basin has made application to the State of New Mexico to install a pressure maintenance project in the Franciscan Lake Field by injecting produced water. Basin Fuels, at this time, wished to temporarily abandon the Easter Flats #2 for the possibility of using same as an injection well in the future.
