Request permission to place this well in inactive status. Cannot afford to produce this well at current oil prices: i.e. \$12.75 per barrel. Well produced an average of 3.37 bbls of oil per day during preceeding ninety (90) day period. This well also has substantial gas reserves behind the pipe, 2240'-2255', but cannot afford to build 4½ mile pipelinet to Gas Co. of NM Star Lake compressor station (nearest market).

Casing in well is sound and no contamination of other formations is contemplated.
