

10. Plans for Restoration of Surface:

- A. After completion of drilling and/or completion operations, all equipment and other material not needed for operations will be removed. Pits will be filled and location cleaned of all trash and junk to leave wellsite in as aesthetically pleasing condition as possible.
- B. Any ungraded pits containing fluids will be fenced until they are filled.
- C. After abandonment, any special rehabilitation and/or revegetation requirements (reseed with seed mixture No. 2) will be complied with and accomplished as expeditiously as possible. All pits should be filled and levelled within 90 days after abandonment.

11. Other Information:

- A. Topography: Relatively flat, rolling surface.
- B. Soil: Soil is sandy clay.
- C. Flora and Fauna: The vegetation cover generally consists of sagebrush, blue gramma and galleta.
- D. Ponds and Streams: There are no streams or ponds in the immediate area.
- E. Residences and Other Structures: Nearest occupied dwelling is an Indian house one-half mile southeast of the wellsite.
- F. Land Use: Present land use is grazing.
- G. Surface Ownership: Wellsite is on Federal surface.

12. Operator's Representative: Gulf Energy and Minerals Company - U. S.
A Division of Gulf Oil Corporation
P. O. Box 670, Hobbs, NM 88240 Telephone 505/393-4121
Area Production Manager C. D. Borland

13. Certification:

I hereby certify that I, or persons under my direct supervision, have inspected the proposed drillsite and access route; that I am familiar with the conditions which presently exist; that the statements made in the plan are, to the best of my knowledge, true and correct; and that the work associated with the operations proposed herein will be performed by Gulf Oil Corporation and its contractors and sub-contractors in conformity with this plan and the terms and conditions under which it is approved.
