17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Merrion Oil & Gas Corporation requests permission to continue the long term shut-in of the subject well. The Navajo 15 No. 6 is a water disposal well and is perforated in the Gallup formation.

I have attached a wellbore schematic for your review. We request a waiver from the requirement to conduct a casing integrity test for the following reasons:

1. We have had no indications of bad casing and believe the integrity to be good.
2. Cement was placed from total depth to surface during primary cement operations.
