TA  
This well is currently in ~~long term~~ shut in status. Request that this status be continued for additional nine (9) month period.

We are currently making application to the Environmental Protection Agency, Region 9, San Francisco, California for permission to inject water into the Point Lookout Interval of the Mesa Verde Formation as a part of our plan to water flood this field, utilizing our Noo Navajo #2 Well located in the NW/4NE/4, Sec. 13, T20N, R6W, N.M.P.M. as an injection well.

The subject well is a direct offset to the proposed injection well, is perforated in this interval and hopefully will benefit from the subject flood.

This well was drilled in 1978. Cement was circulated to surface and no contamination of other formations is contemplated.
