Request this well be placed in inactive status. Well is capable of producing 1 - 3 B.O.P.D. Well will not pump-up due to either hole in tubing or defective pump. Cannot justify repairs at current crude oil prices. Geological studies indicate a gas zone behind the pipe in the well. However, nearest market is 4-1/2 miles distant at Gas Company of New Mexico, Star Lake compressor station. Cannot justify construction of pipeline at current gas prices.

Cement was circulated to surface in this well and Bond Log shows good bonding. Casing is sound. No ground water contamination is contemplated.

Two other wells on this lease will remain on production.
