Attention: Mr. A. R. Kendrick

Reference: Case #6640, Order #R-6143
Miles Production Company
Thomas Drought Section 4
15N, 6W, McKinley, New Mexico

Dear Sir:

Attached hereto is a copy of the subject case. Under the Section "it is hereby ordered" on the reverse side thereof you are advised that Miles Production Company desires to properly plug back the subject well only through the Dakota Formation as the Gallup Sand has previously been cemented off with the 4½" pipe which was set through the Gallup Formation.

It is requested that the highest plug would be required only from 1700' up to 1550' with 35 sacks of cement. The deeper plugs would be the same as shown on form C-103 as approved by the Division office on December 26, 1978.

Based on this, Miles Production Company requests a Division approved program for plugging the well back as per case #6640.

Very truly yours,

MILES PRODUCTION COMPANY

Steve Kirby
Vice President
