Dear James:

The attached form C-103 for the above well is being returned not approved for the following reasons:

- (1) The quantity of cement used is not sufficient to reach 500' above the Dakota formation in violation of Rule 107.
- (2) The Mesaverde and Gallup formations are both exposed behind the pipe allowing commingling of different qualities of fresh water.

The mentioned problems will both have to be taken care of before any further approvals or allowables can be obtained for this well.

If you have any questions, please call this office.

Yours truly,

Frank T. Chavez  
Deputy Inspector
