RE: Red Mountain MV Field
Unorthodox Locations

Dear Sir:

Pursuant to the provisions of Paragraph 2 of Order No. R-2282 Colorado Plateau Geological Services, Inc. hereby respectfully requests permission to drill and produce Santa Fe Pacific No 42 and Santa Fe Pacific No. 47 wells at unorthodox locations in the Red Mountain Mesaverde Field, McKinley County, New Mexico.

Santa Fe Pacific No. 42 is located 105' FNL, and 1610' FEL, Section 29, T20N, R9W. This location was selected because of its high structural position in the Field where by-passed oil may remain.

Santa Fe Pacific No. 47 is located 580' FSL, and 1400' FEL, Section 20, T20N, R9W. This location was selected to test an area where we believe significant amounts of oil may have been by-passed by previous flood pattern.

Correlative rights will not be violated by the proposed locations. Your approval will be greatly appreciated.

Very truly yours,

Mark E. Weidler
Vice-President
