Re: SFPRR #1 P-29-16N-6W and SFPRR #61 E-20-16N-6W

Dear Gary Banks:

SFPRR #1 still needs the casing report (form C-103), deviation report, and the completion report (form C-105). The status on the completion report must show the well is P & A.

These reports must be filed with our office before the final approval will be given for the plug and abandonment.

SFPRR #61 needs a completion report (form C-105) showing the well was a dry hole, perforations (if none, show none), electric logs ran (if none, show none), casing record, and status of well (converted to water well). A copy of all electric logs must be submitted.

These reports must be filed with our office before the final approval for conversion to water well can be accepted for record.

Yours truly,

A handwritten signature in cursive script, reading "Jeff A. Edmister".
