Mr. Jerry W. Long District Engineer U.S. Geological Survey P.O. Box 1809 Durango, Colorado 81301 Re: NTL-6

Dear Mr. Long:

The NTL-6 for Lease NM 10521 is as follows:

- 1. Existing roads--
 - A. See topographic map. Attached map #1.
 - B. Located 19 miles North of San Mateo, N.M. on county maintained farm roads. (Dirt) See attached map #2
 - C. Access road to lacoation is colored orange. (see map #1).
 - D. This is an exploration well, see map #1 for existing wells within 3 mile radius.
 - E. N/A
 - F. We will maintain the ranch roads in accordance with the surface owner's wishes. The county highway dept. and Gulf Oil Corp. are now repairing the stream crossing 0.6 miles west of the location. The existing roads are in suitable condition for drilling rig transit. The various drilling contractors continously use these roads for mineral exploration.
- 2. Planned acces roads -- See map #3.
 - A. Width--12'
 - B. Maximum grade -- 3 to 4%.
 - C. No turnouts will be necessary.
 - D. Access roads will drain into existing ranch road ditching.
 - E. No culverts will be necessary.
 - F. Surfacing material be natural dirt surface.
 - G. No gates or cattle guards will be necessary.

- 3. Location of existing wells-- See map #1
- 4. Location of existing and/or Proposed facilities
 - A. There are no existing facilities.
 - See map #3 for proposed location of production tank, if necessary.
- 5. Location and type of water supply
 - A. See map #1 for location of water supply, two farm tanks and one well. There is adequate water in the tanks for and the land owner has offered us the water in the two tanks.
 - B. Water will be hauled by the drilling contractors water trucks.
 - C. No new water well will be needed.
- 6. Source of Construction materials --
 - A. No construction material will be needed.
 - B. & C. N/A
 - D. None. Surface is privately owned.
- 7. Methods for handling wate materials --
 - Α.
- 1. Drill cuttings will be left in settling pit until dry then properly buried. See map #3
- 2. Drilling fluids will be allowed to dry in mud pits until properly dry then buried.
- 3.Produced fluids (oil and Water) Water will be allowed to burn pit, since water is fresh. Oil will be contained in production tanks. Any oil on pits will be properly burned.
- 4. Sewage disposal--Porta-Potti and sewage pit. See map #3.
- 5. Garbage will be disposed of into a deep garbage pit burned and buried.
- 6. All trash near location will be picked up and burned. All other materials will be hauled off by contractor.
- 8. Ancillary Facilities --
 - A. None will be needed.
- 9. Well site layout -- See detail map #3
- 10. Plans for restoration of the surface -- See attached rehabilitation plan.
- 11. Other Information -- See attached portion of archeological survey by Karol J. Klager. Entitled "Environmental Setting".
