If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

T.D. 3336' Sand. Prep to run 7" OD csg. Due to a strong water flow in the Gallup formation, causing drilling deeper virtually impossible, it was decided to alter our csg program by running 7" OD csg at this depth to eliminate this drilling problem. The setting of 7" OD csg at this depth will allow us to continue to drill deeper to our proposed T.D. of 5420' at which time we will set & cmt a 4½" liner.
