

K-31-104-661 SFPRC #182

APPLICATION FOR AUTHORIZATION TO INJECT

I. Purpose: Secondary Recovery Pressure Maintenance Disposal Storage
Application qualifies for administrative approval? Yes No

II. Operator: Capital Oil & Gas Corporation

Address: P.O. Box 2130 Kilgore, Texas 75662

Contact party: Gary Blanks Phone: 214-983-2081

III. Well data: Complete the data required on the reverse side of this form for each well proposed for injection. Additional sheets may be attached if necessary.

IV. Is this an expansion of an existing project? Yes No
If yes, give the Division order number authorizing the project R-4875

V. Attach a map that identifies all wells and leases within two miles of any proposed injection well with a one-half mile radius circle drawn around each proposed injection well. This circle identifies the well's area of review.

* VI. On File
Attach a tabulation of data on all wells of public record within the area of review which penetrate the proposed injection zone. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of completion, and a schematic of any plugged well illustrating all plugging detail.

On File

VII. Attach data on the proposed operation, including:

1. Proposed average and maximum daily rate and volume of fluids to be injected; 50 BPD
2. Whether the system is open or closed; Closed
3. Proposed average and maximum injection pressure; 250 PSI
4. Sources and an appropriate analysis of injection fluid and compatibility with the receiving formation if other than reinjected produced water; and On File
5. If injection is for disposal purposes into a zone not productive of oil or gas at or within one mile of the proposed well, attach a chemical analysis of the disposal zone formation water (may be measured or inferred from existing literature, studies, nearby wells, etc.).

* VIII. On File
Attach appropriate geological data on the injection zone including appropriate lithologic detail, geological name, thickness, and depth. Give the geologic name, and depth to bottom of all underground sources of drinking water (aquifers containing waters with total dissolved solids concentrations of 10,000 mg/l or less) overlying the proposed injection zone as well as any such source known to be immediately underlying the injection interval.

On File

IX. Describe the proposed stimulation program, if any. 250 Gal Acid

* X. On File
Attach appropriate logging and test data on the well. (If well logs have been filed with the Division they need not be resubmitted.) Electric Log Attached

* XI. On File
Attach a chemical analysis of fresh water from two or more fresh water wells (if available and producing) within one mile of any injection or disposal well showing location of wells and dates samples were taken.

On File

XII. Applicants for disposal wells must make an affirmative statement that they have examined available geologic and engineering data and find no evidence of open faults or any other hydrologic connection between the disposal zone and any underground source of drinking water.

XIII. Applicants must complete the "Proof of Notice" section on the reverse side of this form.

XIV. Certification

I hereby certify that the information submitted with this application is true and correct to the best of my knowledge and belief.

Name: Gary Blanks Title Vice President of Operations

Signature: Gary Blanks Date: 6/3/82

* If the information required under Sections VI, VIII, X, and XI above has been previously submitted, it need not be duplicated and resubmitted. Please show the date and circumstance of the earlier submittal. All information was filed with extension of waterflood on SFPRR # 79 submitted 5-15-82.

DISTRIBUTION: Original and one copy to Santa Fe with one copy to the appropriate Division

NOTICE: Surface owners or offset operators must file any objections or requests for hearings of administrative applications within 15 days from the date this application was mailed to them.

NO ACTION WILL BE TAKEN ON THE APPLICATION UNTIL PROOF OF NOTICE HAS BEEN SUBMITTED.

- (1) The name, address, phone number, and contact party for the applicant; (2) the intended purpose of the injection well; with the exact location of single wells or the section, township, and range location well; with the maximum injection rates and pressures; and (3) the formation name and depth with expected maximum injection rates and pressures. On File
- (4) A notation that interested parties must file objections or requests for hearings with the Oil Conservation Division, P.O. Box 2088, Santa Fe, New Mexico 87501 within 15 days.
- Where an application is subject to admisnistrative approval, a proof of publication must be submitted. Such proof shall consist of a copy of the legal advertisement which was published in the county in which the well is located. The contents of such advertisement must include:
- All applicants must furnish proof that a copy of the application has been furnished, by certified or registered mail, to the owner of the land on which the well is located and to each leaseholder operator within one-half mile of the well.

XIV. PROOF OF NOTICE

- (1) The name of the injection formation shown on schematic need not be repeated. Items must be submitted for each injection well covered by this application. All items used as models for this purpose. Applications for additional wells need be shown only when different. Information shown on schematic need not be repeated.
- (2) The injection interval and whether it is perforated or pool name. (3) Perforations: 804-809. (4) Starts at the injection well was drilled for injection or, if not, the original purpose of the well. (5) Give the depths of any other perforated intervals and detail on the sacks of cement or bridge plugs used to seal off such perforations.

None

B. The following must be submitted for each injection well covered by this application. All items must be submitted for the injection shown on schematic need not be repeated.

Division District offices have supplies of well Sheets which may be used or which submit a "typical data sheet" rather than submitting the data for each well.

(4) The name, model, and setting depth of the packer used or a description of any other seal system of assembly used.

(3) A description of the tubing to be used including its size, lining material, and setting depth.

(2) Each casting starting with its size, setting depth, sacks of cement used, hole size, top of cement, and how such top was determined.

(1) Lease name: Well No.: Location by Section, Township, and Range: and footings location within the section.

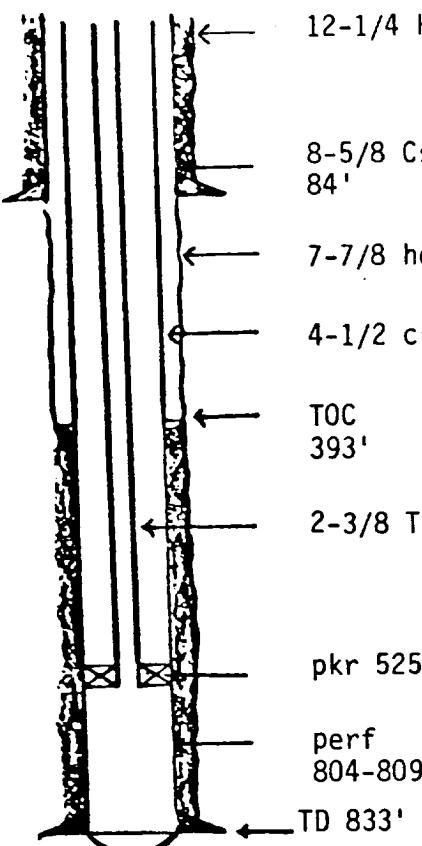

A. The following well data must be both in tabular and schematic form and shall include: All Attached lease name; Well No.; Location by Section, Township, and Range: and footings location within the section. The data must be submitted for each injection well covered by this application.
