Re: Nonstandard Application and Order
SFPRR #80; L-21-16N-6W

Dear Mr. Blanks:

The referenced well has 1340 FSL 660 FWL in the application and order for the nonstandard location. The application for permit to drill and plat have 1330 FSL 660 FWL.

Either a new plat needs to be submitted or a new non-standard application filed with the correct footage.

Yours truly,

Jeff A. Edmister
Geologist II
