Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

Operator of the above referenced well presents this sundry notice of Temporary suspension of production effective, October 10, 1986.

Suspension of production was prompted by the election of current gas purchaser, Gas Company of New Mexico, to reduce the purchase price to levels insufficient to meet monthly operating expenses. Given the current condition of the domestic natural gas market, operator expects prices to rise in the near future, restoring economic operations to this well.

Well is currently shut-in at wellhead connections.
