Re: State #33, H-28-20N-09W ✓

Dear Mr. Law:

We have received your report of commencement of drilling operations for the State #33. The report states that drilling operations were completed on July 3, 1984. A field inspection in December, 1985, revealed that drilling operations were in progress on the State #33. According to our records, you filed an APD (C-101) on December 9, 1985, and it was approved on January 21, 1986. Also, at the legal location shown on the C-103, we have no record of any well having been permitted at that location. Perhaps there is a mistake in either the well name, number, dates or location. Please alter your C-103 to show the following:

1. Correct well name, number and location.
2. Spud report showing date and time well was spudded.
3. A separate C-103 showing casing setting depth, amount and type of cement used, top of cement, and method used to determine cement top.
4. A form C-105, including a summary of all tests conducted on the well and any electric or radio-activity logs run on the well.
5. A form C-104 completely filled out requesting an allowable.

I am returning the C-103 for the referenced well because of the errors mentioned. I have enclosed forms C-103, C-104, and C-105 for your use. Please make the necessary corrections and file the additional forms needed for an assignment of allowable for this well.

Mr. Jim Law
