13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Merrion Oil & Gas requests an additional extension of time to properly test the Menefee Coal in the Little Blue No. 1 Well. Unfortunately, we were unable to put the well on test this summer because our salt water disposal system in the Papers Wash Field has been down due to a generator breakdown and poor wellhead economics to justify a repair.

However, we plan to repair the system by December 9, 1994 and resume disposal operations. At that time we will commence our test of the Little Blue.

Please grant an extension until March 31, 1995. We believe this will allow adequate time to evaluate the Coal potential in this wellbore.
