17. DESCRIBE PROPOSED OR ANTICIPATED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work, if you are directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Operator requests shut-in of well until September 1, 1993. In preparing to place well back in production as said would do in Sundry submitted November 2, 1992, evaluated prior operations. Handling and disposal of brackish water produced are concern to operator as well as economically unjustifiable. Plan to plug Dakota to cut-off source of brackish water and recompleate Gallup which is currently plugged off. Work on well will be completed by December 31, 1993.

Diana Fairhurst of New Mexico Oil Conservation Division has concurred in plan stated above.
