Attn: Mr. Harry R. Bigbee

Dear Mr. Bigbee:

This letter will serve as your authorization to vent low-pressure casinghead gas from your Campos #1-10 well in the Lybcook Gallup Oil Pool for a one-week period. It is our understanding that it is necessary to do this in order to determine the producing capacity of the well.

Yours very truly

Attention: Mr. Emery C. Arnold

Gentlemen:

We would appreciate receiving temporary approval to vent low pressure casing head gas from our Campos 1-10 Well in the Lybrook Gallup Oil Pool for approximately one week.

The reason for venting is that we have been experiencing extreme pump troubles and we wish to give the well a chance to clean up and find out how it operates when it is not bucking a 100% gas line.

Very truly yours,

Harry R. Bigbee
