Well No. 1 is located 990 ft. from N line and 990 ft. from E line of sec. 4

NE/4 4 23N 4W N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Ballard-Pictured Cliffs Rio Arriba New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 7130 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

8 5/8" OD, 240 csg. set at 126'; 5 1/2" OD 144 csg. set at 2884'. Total depth of well is 2960 feet. Proposed work consists of placing a cement plug from 2834 to TD. The second cement plug from bottom will be placed in the top of the 5 1/2" casing stub over a 100-ft. interval. The third cement plug will be spotted from 680 to 750 ft. from the surface. All intervals between cement plugs will be filled with a mud laden fluid. A cement plug will also be placed at the top of the surface pipe. The surface of the ground surrounding the well will be cleaned up of debris and connection with well operations.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
