Well No. 1 is located 990 ft. from N line and 990 ft. from E line of sec. 4

NE/4 4 23N 4W NMPM
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Ballard Pictured Cliffs Rio Arriba New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 7138 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate plugging jobs, cementing points, and all other important proposed work)

Work Performed: A cement plug was spotted from 2960' to 2834'. The 5-1/2" O.D. Casing was shot off at 930' and 30 joints (930 ft) were pulled. A cement plug was spotted from 980' to 880'. Another cement plug was spotted from 750' to 650'. All intervals between cement plugs were filled with heavy mud. A cement plug was placed in the top of the well and a regulation marker installed. The surface pits were filled and the well location leveled.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
