1000 RIO BRAZOS ROAD
AZTEC, NEW MEXICO

May 6, 1964

*Amerada Petroleum Corporation
Box 1469
Durango, Colorado*

Attn: Mr. D. F. Furse

Dear Dan:

We have received two copies of Federal Notice of Intention to Drill, along with acreage dedication plats for your #1 Jicarilla Apache "H" Tract 1 located in the NW $\frac{1}{4}$ Section 15-23N-2W.

This well is located within the South Blanco Pictured Cliffs Pool and the pool rules in this pool specify 160-acre spacing. Therefore your plats should be re-filed showing a 160-acre dedication.

Also the well is located 650 feet from the boundary line of the quarter-section which makes it a non-standard location. A standard location in this pool is 790 feet from the boundary line of the tract upon which the well is located. If your well is non-standard for topographic reasons you may secure approval of a non-standard location by making application to Mr. A.L. Porter, Jr., Box 2088, Santa Fe. Your application should include specific information as to why the drilling of a well in a standard location would be unreasonably expensive. A copy of your application should also be mailed to offset operators.

If you need assistance with any of the above please contact us.

Yours very truly

*Emery C. Arnold
Supervisor, District #3*
