The elevation of the ground floor above sea level is 7335 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

To continue report of August 28, 1962, a completion rig was moved on location on October 5, 1962. 1" tubing was pulled and 3,015' of 2" EUE tubing was run to 3001'. Swabbing operations were commenced on October 7, 1962. Subject well swabbed. Frac water had traces of oil. Installed pumping unit on October 10, 1962. Ran 119' of 5/8" x 25' rods, landed at 2985'. Installed sergeant bottom hole pump 2" x 1 3/4" x 8" at 3001'. Well pumped first 24 hours, 116 barrels of fluid, 30% water cut. On October 11, 1962. On October 12, 1962 well pumped 31 barrels of fluid in 15 hours, 30% water cut. On October 13, 1962, well pumped 48 barrels of fluid, 30% water cut. During the period October 13 to present date, subject well pumping frac water, formation water with traces of oil. Well is presently pumping approximately 3 barrels of water oil and 30 barrels of water. Additional remedial work to be done, the results of which shall be filed with your office.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
