17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Plan to:

1. Run 2-7/8" CIBP and set at 2940'.
2. Load 2-7/8" csg. w/12 bbls. 2% KCL water & press test csg. to 500 PSI.
3. Temporarily abandon well.

This intention form supercedes the previously approved abandonment procedure which was approved on 4-26-90. There is evidence that the CIBP at 2950' may have been leaking during the pressure test on 2-6-90. Therefore, the proposed test will insure casing integrity. In addition, Amerada Hess will perform the test within seven days from the approval date.
